November 16, 2011

Edoc signs Genesis Energy and Inland Marine Service

Victoria, BC – 2011 is finishing off well for Edoc Systems Group. Two more companies have chosen Edoc's Helm Marine Operations™ software for their workboat operations. **Genesis Energy** out of Houston, Texas and **Inland Marine Service** from Hebron, Kentucky have selected Helm to manage their operations.

"We are very pleased to welcome two more great customers to the Edoc family," said **Bill Reid**, President of Edoc Systems Group. "This marks a banner year for us; and it's not over yet." Reid is referring to the launch of Edoc's new Safety Management Software (SMS), Helm Safety Manager™, at this year's **International Workboat Show** in New Orleans. Edoc has already signed several new customers for Helm Safety Manager, and anticipates many more will sign on after the launch later this month.
